Pump Range

OSNA Centrifugal

Multistage pumps

MH (NMH)

High Pressure Multistage Centrifugal Pump

1. Exterior radial deep grooved ball bearing for quiet running.
2. Self Blocked gland packing, suction side up to 580psi/ 40 bar system pressure (mechanical seal optional)
3. Impellers optimum formed
4. Suction and discharge connections acc. to DIN; POSITION VARIABLE.
5. Shaft corrosion resistant chrome steel.
6. Stage casing of high quality cast iron.

Centrifugal Pump

MV (NMV)

Application

- For municipal and Industrial water supply
- Waterworks
- Booster and irrigation systems
- Boiler feed water and Condensate
- As well as for cooling and hot water circulation
- Ship pumps
- Fire extinguishing pumps
